DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5, 8-10, and 16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Fall, regarding claim 16, wherein Fall (US 5,757,810) teaches error detection and discarding thereof. The improvement comprising, comparing, in the mobile station **and** the speech encoder unit, the content of received speech blocks with accompanying parity bits for **possible error discovery**, to be able to, when errors (wherein there must be more than one error occurred) occur, **hide** (not discard, but hidden, by definition and as defined by the specification and arguments) the errors during the decoding of the received speech blocks.

As per claim 1, the improvement over Hellwing (US 6,295,302) in view of DeJaco (US 6,205,130), includes, **supplying error discovering encoding in the encoder at the first node, after the compression and sorting positions of speech parameters (wherein the positions of the**

speech parameters must be sorted) in said compressed speech block according to importance.

Claims 2-5, and 8-10 are allowed, as their parent claims have been deemed allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Kirchherr et al. (US 2003/0009325) teaches bit error concealment by the decoder.
- Kondo et al. (US 4,903,301) teaches sorting speech parameters according to importance.
